HARD SKILLS

- HTML •CSS •JavaScript
- TypeScript •React
- Next.js •Node.js
- Express •MongoDB
- Mongoose •Zustand
- React Query •Formik
- Yup •Zod •JWT •Auth
- Git •GitHub •Vite
- Figma •Trello

SOFT SKILLS

- Teamwork
- Responsibility
- Problem-solving
- Time management
- Adaptability
- Communication

LANGUAGES

- English — beginner
- Ukrainian — upper-intermediate
- Russian — native

SUMMARY

Junior Full-Stack Developer with hands-on experience building responsive web applications using modern technologies, including HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, Express and MongoDB. I have delivered a solo commercial project for a real business client, alongside team projects using Agile/Scrum methodologies. I am a problem solver with an eye for detail and experience diagnosing and fixing cross-stack issues. I have served as a Scrum Master, ensuring effective team coordination and timely project delivery.

EDUCATION

- IT School GoIT** 2025-2026
Full-Stack Developer
- Mariupol College of Mechanical Engineering and Metallurgy, PDTU** 1991-1995
Electrical Engineering – Power Systems and Automation

WORK EXPERIENCE

- Cancer Clinic** 2022 — to date
Electrician – Medical Facility
Responsibilities: Implementation of backup power supply systems and maintenance of mission-critical electrical infrastructure.
Achievements: Successful integration of emergency generator systems that ensure 100% uninterrupted operation of medical equipment
- KATRANBUD, LLC** 2019- 2022
Director
Responsibilities: Managed the team, project workflows, and strategic planning.
Achievements: Developed an internal digital system for payroll processing and reporting, which increased operational efficiency by 20%.

PROJECT EXPERIENCE

- WONA Bride — Wedding Dress Salon Website**
Demo:wona-bride.com.ua/ **Code:**github.com/Andrii-Mitko/wona_bride
Technologies: Next.js, React, TypeScript, MongoDB, Mongoose, Zustand, React Query, Formik, Yup, Zod, Cloudinary, Nodemailer, Vitest.
Description: Commercial full-stack e-commerce website built for a real bridal and evening-dress salon — live in production and actively used by the business.
Functionality: Dress catalog with filtering/pagination, cart and wishlist, order form with email/Telegram notifications, and an admin script for managing inventory.
Role: Solo Full-Stack Developer. Built the entire application end-to-end: Next.js/TypeScript frontend, backend API and MongoDB models, Cloudinary image handling, form validation, Zustand/React Query state, and Vitest tests.
- Harmoniq — Webcrafters Project 03 (Team Project)**
Demo:harmoniq.vercel.app **Code:**github.com/harmoniq
Technologies: TypeScript, React, Next.js (App Router), Node.js, Express, MongoDB, Mongoose, Zustand, Formik, Yup, Zod, JWT, Git.
Description: Full-stack social publishing platform built by a 13-person team in a single monorepo (Next.js frontend + Express backend).
Functionality: Authentication with JWT, protected/guest routes, article catalog with filtering/pagination, user profiles and bookmarks.
Role: Feature Owner — Login, Auth State & Route Guards. Built login form and Express endpoint, Zustand auth store, and route guards. Fixed cross-stack bugs and refactored backend error handling.
